^[1] Not recommended for thin wall pipe.

MORE INFORMATION

One easy revolution of REED exclusive **DEB4** deburrs and produces a 15° external chamfer in seconds. DEB4 deburrs the outside of the pipe only to allow easy assembly into fittings. It fits comfortably in one's hand for a secure grip. As an alternative to hand turning, there's a 1/2" square drive pocket on the backside for use with a ratchet wrench. DEB4 creates a smooth, chamfered pipe end so solvent can be spread evenly for pipe joining. Aluminum die-cast DEB4 deburring tool features a hardened steel blade that is reversible, sharpenable and replaceable. Fits six nominal pipe sizes of PVC, CPVC, ABS and PP up through 4" diameter.
